

National Curriculum

Year 4 Multiplication and division

Children need to:

- *recall multiplication and division facts for multiplication tables up to 12×12*
- use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers
- recognise and use factor pairs and commutativity in mental calculations
- multiply two-digit and three-digit numbers by a one-digit number using formal written layout
- solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects.

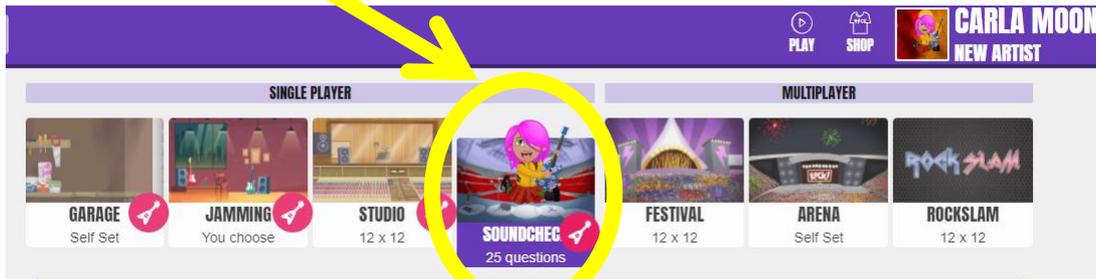

In the Summer term, the children in Year 4 will now have a times tables check to determine whether your child can fluently recall their times tables up to 12. However, there is no pass mark for this year but your teacher can share your child's score.

What is the Multiplication tables check?

It is an on-screen check consisting of 25 times table questions. Your child will be able to answer 3 practice questions before taking the actual check. They will then have 6 seconds to answer each question. On average, the check should take no longer than 5 minutes to complete.
